

Company Overview

SSE is a high-tech company specialising in the design & manufacture of ISO 9001 Telemetry Systems. With over 20 years experience in the telemetry market, SSE has grown by adding new products to its market offering, namely: Energy Management Solutions, Industrial Automation, SCADA & Communication Systems.

SSE's business philosophy has been to continually expand by upgrading products and services to keep up with changing technology. Because of the rapid expansion into the Southern African market, SSE have placed branches in Pretoria, Cape Town, Durban and Port Elizabeth as well appointing hand picked systems integrators all over Southern Africa.

SSE's successes to date have resulted from the delivery of high end products and solutions to the industrial sector with continued attention to customer service

Products and Areas of Expertise

Telemetry & Industrial Automation

SSE specializes in RTU/PLC automation and process control in the industrial & municipal environment. Our association with leading brand products combined with our communications and SCADA products and skills enables us to provide turkey automation solutions for small, large and medium sized industrial automation projects.

Industrial Communications

SSE have years of experience in the field of manufacture and installing of radio telemetry systems. With changing market demands we have added Wireless Ethernet, industrial Ethernet, Cellular and Internet to complement our range of communications products and expertise. Our technical ability and product range enables us to provide a communications network for most industrial applications.

Energy Management

SSE is an approved ESCO (Energy Services Company) Our products and solutions in this market include: Load Shifting, Energy Saving, Energy Metering and Billing and Quality of Supply. SSE is appointed distributors of the Conserve Range of Energy Saving Instrumentation products as well as manufactures of SSE Load Switches for Residential Demandside Load Management.

SCADA & MES

SSE has a long history in the SCADA industry. Originating back to Dos base applications in the 80's to the high tech Windows SCADA environment today our engineering levels now include stand alone SCADA & HMI solutions to wide area multilevel distributed networks as well as Industrial Information Management Solutions such as reporting and database solutions.

The SSE Success Formulae

SSE's business philosophy has been to continually expand by upgrading products and services to keep up with changing technology. Because of the rapid expansion into the Southern African market, SSE have placed branches in Pretoria, Cape Town, Durban and Port Elizabeth as well appointing hand picked systems integrators all over Southern Africa.

SSE's successes to date have resulted from the delivery of high end products and solutions to the industrial sector with continued attention to customer service.

SSE delivers products and solution sets into the Mining, Industrial, Municipal and Government Sectors.
